

1. A Sales Receipt Screen for Sounds-A-Rounds Music Store

Sounds-A-Rounds Music Store needs you to create a sales receipt screen for them. Figure 2-28 and Figure 2-29 show the sketch and notes for the screen.

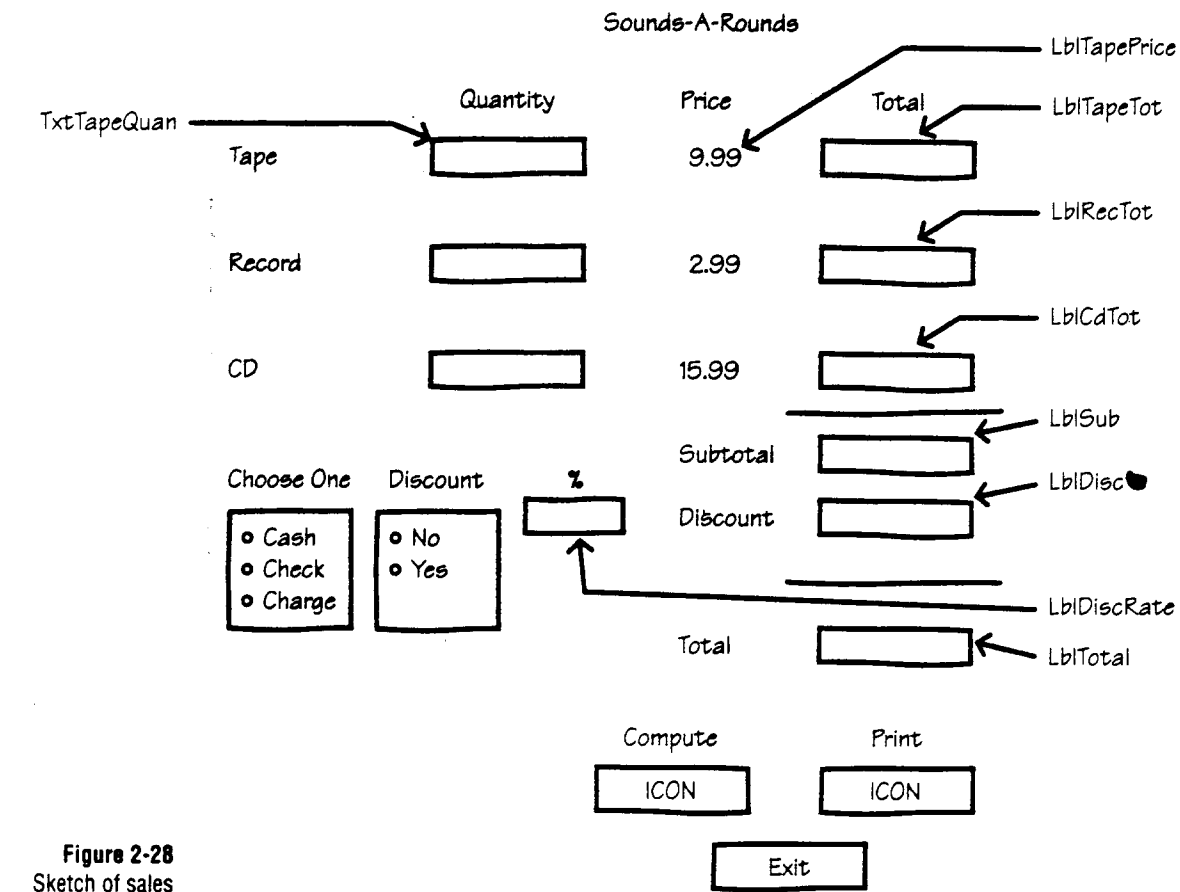

Figure 2-28
Sketch of sales
receipt application

1. This application will compute and print a sales receipt for the customer.
2. Sounds-A-Rounds sells Tapes, Records, and CDs.
3. Sounds-A-Rounds gives a 10% discount to customers with a Sounds Discount card.
4. The salesperson will need to provide the following information:
 - Quantity of tapes, records, and CDs purchased by the customer
 - Whether or not the customer gets a discount
 - Whether the customer is paying by cash, check, or charge
5. The application will provide the following information:
 - Total price for the tapes, records, and CDs
 - Subtotal
 - Amount of the discount
 - Total purchase price
6. The application should include icons appropriate for:
 - Computing the subtotal, the discount, and the total price
 - Printing the form
7. The application should include an Exit button to end the application.
